EDUCATION

Kalinga Institute of Industrial Technology

Bachelor of Technology in Computer Science

Bhubaneswar, Odisha

Aug 2023 – Present

PROJECTS

Game Development Project — IIT Guwahati Game Jam (GameDeon)

Aug 2026

- Developed and published a complete game on itch.io as part of a two-member team under strict time constraints
- Secured **7th place out of 50 teams** nationwide
- Invited to IIT Guwahati for final presentation and certification
- Focused on gameplay mechanics, logic implementation, and collaborative development

Home Server & Security Lab | Proxmox Virtualization

Dec 2025

- Designed and deployed a virtualized home lab using Proxmox to simulate real-world network environments
- Implemented DNS-based ad and threat blocking using Pi-hole to reduce attack surface
- Secured remote access via Tailscale (WireGuard VPN), avoiding direct public exposure
- Deployed isolated services using VMs and Docker containers, including Jellyfin, Pi-hole, and FreeNAS

Custom Minecraft PvP Client | Java

Oct 2021

- Built a custom Minecraft PvP client focused on performance optimization and enhanced combat experience
- Implemented client-side features including custom animations, input handling, and combat mechanics
- Optimized rendering pipelines and event handling to improve FPS and reduce latency

Discord Bot (Backend Automation & API Integration) | Python

Oct 2021

- Developed a Discord bot to automate moderation, utility, and server management tasks
- Integrated third-party APIs and implemented role-based command permissions
- Designed asynchronous event handling to ensure responsiveness and scalability

CERTIFICATIONS

Hackmanthan 2.0

Covered fundamentals of cybersecurity, networking, and commonly used security tools

Techfest, IIT Bombay

CyberStorm x RedFox CTF

*Ranked **59th worldwide** in an international CTF organized by RedFoxSec*

CvCTF

*Secured **1st place** in a university-level CTF organized by CyberVault*

Winter Arc CTF

*Placed **3rd** in a multi-way tie among top participants*

TECHNICAL SKILLS

Languages: Java, Bash, Python, C/C#, SQL, JavaScript, HTML/CSS, Rust

Frameworks: React, FastAPI, WordPress, Metasploit

Developer Tools: Git, Docker, AWS, Google Cloud Platform, Neovim, Visual Studio, PyCharm, IntelliJ, Eclipse, Burpsuite, Wireshark, netcat, Ghidra, Pi-hole, nmap

Libraries: pyjwt, Gson
